

Amy Brittain
Oklahoma Department of Environmental Quality

Amy Brittain is the Risk Management & Groundwater Program Manager of the Land Protection Division of the Oklahoma Department of Environmental Quality. In this position she manages the Voluntary Cleanup and Chemical Reporting programs as well as coordinating groundwater and risk decision making across the division. Previously, Amy served for 13 years as the Section Manager for the Superfund Program working on Superfund Site Assessment projects, Superfund investigation and remediation projects, Formerly Used Defense Sites and CERCLA caliber state voluntary cleanup projects. Amy currently serves as a representative to the DEQ Information Technology Work Group, the State Geographic Information Council Data Sharing Workgroup, and DEQ Geographic Information System (GIS) Subcommittee. Amy is a graduate of the State of Oklahoma's Certified Public Manager program (2016). Amy earned a B.S. in Geology from Virginia Tech (1999) and a M.S. in Geology from Oklahoma State University (2001).

Amy has been an active member of ASTSWMO since 2012. Previous positions held within ASTSWMO include as Remedial Action Focus Group Member, Vice Chair, and Chair (2012-2017) and Chair of the CERCLA and Brownfields Subcommittee from 2017 through 2020. She has been a contributor to ASTSWMO Superfund Position Papers and Work Products and a presenter and session moderator at many Association meetings. Amy represented ASTSWMO speaking at a U.S. House of Representatives Subcommittee Hearing (2016).

Amy lives in Oklahoma City with her husband, Brad, of 16 years, whom she met at geological field camp in college, 14-year-old son, Ean and 6-year-old English bulldog, Gussie.
